

Alex Tucker

**BSc(Hons) | Dip-Arch | RIBA | ARB | MBA
Founder | Director**

Alex is an architect, with over twenty years' experience of working on award-winning public and private projects around the world.

From strategic urban design and master planning to architecture and design, Alex has worked across all scales from macro to micro. Highly creative and innovative, he brings an open and collaborative approach to his work, building and leading teams with empathy and energy to achieve the highest levels of success.

With significant experience across transport, culture, education, leisure and residential, Alex leads multidisciplinary teams and has provided strategic direction on numerous national infrastructure projects from early-stage conception, through all design stages, and in construction. Notable recent projects include working alongside Arcadis on HS2 Curzon Street Station, and as part of the global design team tendering for Shenzhen Transport Interchange.

A recent Hult International Executive MBA graduate, Alex brings a commercial and strategic lens to his work, assisting clients at the very earliest stages of a project to develop the business case and articulate their vision to maximise their return on investment and generate lasting value for partners, communities, and the environment.

A guest lecturer and critic at Kingston University and Central St Martins, Alex is also an active mentor supporting young architects in a profession he believes can help address the great challenges faced in society today.

Alex is passionate about the potential of design and innovation to unlock lasting social value, harness the power of the circular economy and meet the challenges of the future. With that aim, he founded OLO: a growing and diverse team of the most talented architects, storytellers, place makers, artists and technologists sharing a core belief that holistic thinking creates enduring design.
